

Come learn about basic plant identification and what a herbarium is! The curator of the USC Herbarium, Dr. Herrick Brown, will explain what is done at a Herbarium and why it is important. After the presentation we will show you how to make your own simple herbarium specimen for your personal collection. You may even learn about some spooky plants!! Register today at: <https://www.richlandlibrary.com/event/2020-10-24/steam-studio>

[STEAM Studio | Richland Library](https://www.richlandlibrary.com/event/2020-10-24/steam-studio)

Join us for inventing, building, and creating, using Science, Technology, Engineering, Art, and Math! Learn about basic plant identification and what an herbarium is! The curator of the University of South Carolina's Herbarium, Dr. Herrick Brown, will explain what an herbarium is and why it is important. After the presentation, we will show you how to make your own simple herbarium specimen for your personal collection.
